

Testimonial – Reference Letter

Athens, December 2020

GEP S.A. is the leader in Health and Safety services in Greece, providing high quality Occupational Health and Safety services to corporate clients with the most complete and specialised network of Occupational Doctors and Safety Officers in the country.

Health, Safety and Wellbeing of employees constitutes a fundamental parameter of sustainable development and especially during the coronavirus pandemic GEP services have come to the centre of attention and high demand.

In its everlasting effort to innovate, plan, adopt and meet current and future demand and trends, GEP leadership decided to establish a comprehensive Sustainable Development Strategy and sought support and funding through the Advice for Small Businesses (ASB), SME Finance & Development Group of the European Bank for Reconstruction and Development (EBRD).

Global Sustain Group, a sustainability advisory firm, and accredited consultant under the EBRD ASB programme provided support for the development of the GEP Sustainability Strategy.

Global Sustain worked with GEP executives to define our sustainability pillars and objectives by engaging diverse groups of internal and external stakeholders, performed a thorough materiality assessment based on international guidelines and initiatives (such as GRI, UN Global Compact and the UN Sustainable Development Goals) and drafted a sustainability action plan with specific KPIs and targets.

This is to testify the high professionalism, support and expert guidance of the Global Sustain team in the development of the GEP sustainability strategy.

We highly recommend Global Sustain as a trusted partner to deliver high quality advisory services in corporate responsibility and sustainability.

Sincerely,

George Lamprinos
Chief Executive Officer
