November 2015

Reference Letter

Being a Global Sustain member is essential for Microsoft; not only for the dissemination of our sustainability news and networking opportunities, but for the advice and support that they give.

The Global Sustain team brings a high level of expertise and a strong project and event management skills. Since 2010, they understand what we want to achieve supporting the NGOs and step forward to execute that vision.

The company is also very good at keeping its members fully informed and up-to-date with the latest news and industry developments.

We look forward to continuing and developing exciting collaborative projects with the company.

Kind regards,

Timoleon Platsas,
Communications Lead
Microsoft Hellas
