

**Job Title:** IT Consultant  
**Position Type:** Permanent contract  
**Location:** Hybrid  
**Application Deadline:** Open until filled.

Global Sustain seeks to recruit an experienced internal IT Consultant with expertise in full stack development, front-end and back-end technologies, React, Node.js, database administration, and API development.

Joining our team as an Internal IT Consultant will provide you with the opportunity to work on exciting projects, leverage your expertise and contribute to the growth and success of our organization. If you are a self-motivated, tech-savvy professional with a passion for innovation, we encourage you to apply.

**Job Purpose:**

As an internal IT Consultant, you will be responsible for designing, developing, and maintaining various software solutions, providing technical guidance and support to our internal and external teams and developers, and ensuring the smooth operation of our IT infrastructure. This role requires strong problem-solving skills, effective communication, and the ability to work collaboratively with cross-functional teams to support the implementation of Global Sustain services across its three business departments, namely: (a) Membership Services, (b) Advisory Services, and (c) Digital Services.

**Responsibilities:**

- Collaborate with internal and external teams to understand their business needs and requirements and provide technical solutions and recommendations.
- Design, develop, and maintain full stack applications using front-end and back-end technologies such as React, Node.js, HTML, CSS, JavaScript, WordPress and others.
- Build user interfaces that are intuitive, responsive, and visually appealing.

- Develop and maintain efficient and secure database structures, including data modelling, indexing, querying, and optimization.
- Perform database administration tasks, including backup and recovery, performance tuning, and monitoring.
- Create and maintain APIs to integrate various systems and services.
- Identify and troubleshoot software defects and performance issues and implement appropriate solutions.
- Stay up to date with industry trends, best practices, and emerging technologies related to full stack development and IT consulting.
- Collaborate with cross-functional internal and external teams to ensure successful implementation and deployment of software solutions.
- Provide technical guidance and support to internal and external teams, including training, documentation, and troubleshooting assistance.

**Requirements:**

- Proven working experience as a full stack developer, with expertise in front-end and back-end technologies.
- Strong proficiency in React, Node.js, HTML, CSS, JavaScript, WordPress and related frameworks and libraries.
- Solid understanding of database concepts and experience with database administration, preferably with SQL and NoSQL databases.
- Experience in API development and integration, using RESTful or GraphQL interfaces.
- Familiarity with version control systems.
- Strong analytical and problem-solving skills, with the ability to quickly identify and resolve technical issues.
- Excellent communication and interpersonal skills, with the ability to effectively collaborate with cross-functional teams within and outside the Company.

- Ability to work independently and manage multiple projects simultaneously.
- Strong attention to detail and commitment to delivering high-quality work.

**Preferred Qualifications:**

- Master’s degree in Computer Science, Information Technology, or a related field.
- Professional certifications in relevant technologies or frameworks.
- Experience with cloud platforms such as AWS, Azure, or Google Cloud.
- Knowledge of DevOps practices and tools.

**Note:** The responsibilities and qualifications outlined above are intended to describe the general nature and level of work performed by the individual assigned to this role. They are non-exhaustive and may be adjusted or modified based on Global Sustain needs.

**About Global Sustain:**

Founded in 2006, Global Sustain creates awareness and inspires and supports companies and organisations to embody sustainability, through advisory, communications, networking, training, and digital services, with a focus on the people-planet-profit philosophy. Its members include corporations, civil society organisations, municipalities and local authorities, educational foundations, media, professional bodies, think tanks and other public or private entities. Global Sustain has an international track record of delivering ESG projects for public and private companies, commercial and investment banks, asset management firms, private equity funds, sovereign wealth funds, international financial institutions, and rating agencies. Global Sustain has delivered projects in different industries in 35 countries across Europe, Asia, Africa, Middle East, and the Americas. Global Sustain also operates an ESG Digital Services Division that has developed an innovative digital ESG platform for data collection, assessment, and risk management. Global Sustain is a signatory to the Ten Principles of the UN Global Compact, to the Principles for Responsible Investment (PRI) and TCFD, a GRI Community Member, a member of Social Value International, and CEO Clubs among others.
